

Curious to find out how to integrate sustainability perspectives in your PhD thesis? Sign up for our new PhD course: Interdisciplinary course in sustainable development, 3hp

- Expand your understanding of sustainable development and related key concepts, such as the Anthropocene, Planetary Boundaries, Resilience and the Agenda 2030
- Learn how key concepts are applied and how they evolve and are contested in different scientific practices
- Apply selected key concepts to your ongoing PhD research project

This interdisciplinary PhD course (3hp) rests on perspectives from within social sciences, natural sciences and the humanities and is hosted by the Department of Thematic Studies – Environmental Change (Tema Miljöförändring).

Welcome with your application!

Course Duration: September - October 2021.

Contact persons: susanne.eriksson@liu.se (application) & anders.n.hansson@liu.se (course leader)

Deadline for applications: 18th June 2021
